Correct

The R language was developed by Ross Ihaka and Robert Gentleman who were statisticians at the University of Auckland in New Zealand.

2. The definition of free software consists of four freedoms (freedoms 0 through 3). Which of the following is NOT one of the freedoms that are part of the definition? Select all that apply.

1 / 1 point

The freedom to improve the program, and release your improvements to the public, so that the whole community benefits.

The freedom to restrict access to the source code for the software.

Correct

This is not part of the free software definition. Freedoms 1 and 3 require access to the source code.
